Mrs. Betsy Thorsen died at her home in La Salle county Thursday, Nov. 3. Funeral services were held at the Norway Lutheran church Tuesday, Nov. 7, conducted by Rev. N. G. Peterson of Newark. She is survived by G. O. Thorsen of Newark, Thomas and Melvin at home, and one daughter, Belle.

Mrs. Malinda Larson and daughters were shopping in Aurora Saturday.

Mr. and Mrs. H. E. Olsen and Mrs. R. H. Williams visited at the home of Rev. and Mrs. A. O. Hartvelt in Ottawa Tuesday.

No Feathers on Birds

Young birds of some species possess no plumage at all in the nesting stage—not even a trace of down, says the American Forestry Magazine. This is well seen in the young of the hornbill of certain islands of the East Indies.

OUR SHOE REPAIRING DEPARTMENT IS UNDER THE SAME PROFICIENT MANAGEMENT

All work absolutely guaranteed

No Stone Bruises! No Rim-Cuts! No Blow-Outs!

Hydro-Toron Tires

are Guaranteed for 10,000 Miles

Hydro-Toron Tires are made by new and advanced processes that put them entirely out of the class of ordinary tires. They wear only on the outside. Put them on your car and enjoy a new sensation—the pleasing certainty of uninterrupted mileage that is making these tires the fastest selling tires in America today.

Internal Hydraulic Expansion

The Internal Hydraulic Expansion Process makes it possible for us to say that in practically all cases Hydro-Toron tires are unblemished; that there are no "seconds," that punctures, with resulting blow-outs, rim-cuts and blow-outs are so near unknown that they are guaranteed to give 10,000 miles of road service against these common troubles. Besides, it results in perfect vulcanization. All the pressure in the mold is from within. It comes out with every layer, the tread, the cushion, etc., in proper place—without buckles, blisters, or tears to cause trouble later on.

Toron (No-rot) Fabric

Every layer is Toron treated, enabling the fabric to resist the damaging effects of water and air. Toron waterproofs the fabric down to the tiniest cord and cell in the fabric—causes more rubber to remain in the fabric. The holding power of the layers to each other, of tread and cushion stock and all parts of the tire, is vastly increased—60% greater in fact than in average tires.

Big as Cords—Better than Cords
